

JsgSmile Procurement / RFQ / Tender / Bidding Process Documentation

1. Purpose of This Module

The procurement module will allow buyers to raise requirements and allow verified sellers/vendors to participate through a secure bidding process.

Your portal should support **two main purchase flows**:

1. Direct Purchase
2. RFQ / Tender / Bid-Based Purchase

Government e-procurement portals generally support online tender creation, publication, online bid submission, bid opening, evaluation, and award of contract. CPPP documentation describes e-procurement as a web-based system where institutions create and publish tenders, receive bids, open them online, evaluate bids, and assign contracts to selected bidders. ([DMEQ](#))

2. Types of Procurement in JsgSmile

A. Direct Purchase

This is used when the buyer wants to purchase directly from a seller without a full bidding process.

When to use Direct Purchase

Small value purchase

Urgent purchase

Standard catalogue product

Known seller or verified seller

No technical comparison required

No formal tender required

Direct Purchase Flow

Buyer logs in

Search product/service

View seller/product details

↓

Add to cart / request direct quote

↓

Buyer confirms quantity, delivery location, taxes

↓

System creates purchase order

↓

Seller accepts order

↓

Seller delivers goods/services

↓

Buyer creates GRN / delivery confirmation

↓

Invoice generated

↓

Payment initiated

↓

Settlement completed

Documents Required in Direct Purchase

Usually fewer documents are required:

Buyer side:

- Purchase request
- Delivery location
- Billing details
- GST details
- Purchase approval, if needed

Seller side:

- Product catalogue
- GST certificate
- Bank details
- Invoice
- Delivery challan

No technical evaluation, financial evaluation, L1 ranking, or bid award process is required here.

B. RFQ / Tender / Bid-Based Purchase

This is used when the buyer wants multiple sellers to submit technical and financial offers.

When to use RFQ / Tender

Large value purchase

Bulk procurement

Custom product/service

Technical specifications are important

Multiple sellers should compete

Buyer wants transparent price comparison

Buyer wants L1/L2/L3 ranking

In GeM-style bidding, sellers submit technical and commercial bids before bid closure, and later the buyer completes technical evaluation before financial stages. Public GeM documents also describe bid-to-RA and technical/commercial submission before closure. ([Gov e-Marketplace](#))

3. Main Users / Roles in the System

1. Requirement User / Department User

This is the person who needs the product/service.

Example:

Factory department

Purchase department

Plant head

Maintenance department

IT department

Safety department

HR department

Responsibilities:

Raise requirement

Add quantity

Add technical specification

Add delivery location

Upload requirement document

Mention urgency

Mention expected budget

Send request for approval

2. Buyer / Procurement Officer

This user converts the internal requirement into a proper RFQ or tender.

Responsibilities:

Review requirement

Prepare tender/RFQ

Add eligibility criteria

Add documents required from sellers

Add technical specifications

Add financial quote format

Set bid start date and end date

Set technical opening date

Set financial opening date

Publish bid after approval

Evaluate sellers

Recommend award

3. Buyer Approver / Competent Authority

This user approves the tender before publishing.

Responsibilities:

Approve purchase requirement

Approve estimated budget

Approve tender document

Approve custom bid / BOQ bid

Approve corrigendum

Approve final award

Approve non-L1 selection only with proper justification

For custom/BOQ-style procurement, GeM public training documents mention that a signed undertaking of competent authority is mandatory for BOQ/custom bid creation in specific cases.

4. Seller / Vendor / Supplier

This user participates in the bid.

Responsibilities:

Login to portal

Complete seller verification

View eligible bids

Upload technical documents

Upload financial quote

Submit bid before closing date

Respond to clarification

Track qualification/disqualification status

Accept award if selected

GeM seller participation documents show sellers upload requested documents, financial documents, Udyam certificate where applicable, Make in India supporting documents, and submit offers using OTP/eSign/DSC-style verification.

5. Technical Evaluator

This user evaluates the technical eligibility of sellers.

Responsibilities:

View seller technical documents

Check eligibility criteria

Verify certificates

Check specification compliance

Ask clarification

Mark seller as Qualified or Disqualified

Add remarks

Upload technical evaluation report

In GeM public process documents, the buyer can view seller documents, seek clarification, verify MSE/MII status, and accept or reject sellers with comments during technical evaluation.

6. Financial Evaluator

This user opens financial bids only after technical evaluation.

Responsibilities:

Open financial quote of technically qualified sellers

Compare total quoted value

Generate L1, L2, L3 ranking

Check taxes, freight, warranty, AMC, CMC, other charges

Prepare price comparison

Recommend L1 bidder

Government-style two-bid systems generally open technical bids first, and financial bids only for technically suitable bidders. A procurement manual excerpt states that in a two-bid system, only technical bids are opened first, and financial bids of only technically compliant firms are opened later. ([BidPlus](#))

7. Admin / Platform Authority

This user controls the platform-level process.

Responsibilities:

Approve buyer bids before publishing

Reject incomplete bids

Monitor seller participation

Monitor clarification history

Monitor technical evaluation

Monitor financial evaluation

Approve final award

Maintain audit logs

Export reports

Handle complaints

4. Complete RFQ / Tender Flow

Stage 1: Requirement Raised by Buyer Department

The process starts when a buyer organization needs goods or services.

Requirement Form Fields

Requirement title

Product/service category

Detailed requirement description

Quantity

Unit

Delivery location

Expected delivery timeline

Estimated budget

Technical specification

Preferred brand/make, if any

Warranty requirement

Installation requirement

Inspection requirement

Payment terms

Supporting documents

Buyer Documents at Requirement Stage

1. Requirement note
2. Technical specification document
3. Scope of work
4. Quantity sheet
5. Delivery schedule
6. Budget approval note
7. Previous purchase reference, if any
8. Drawing/design document, if applicable
9. BOQ file, if applicable
10. Internal approval document

Stage 2: Requirement Verification

Before publishing the bid, the buyer organization or admin should verify the requirement.

Who verifies?

Procurement officer

Department head

Finance approver

Technical officer

Competent authority

Portal admin, if platform approval is required

What is verified?

Is the requirement clear?

Is the quantity correct?

Is budget approved?

Are technical specifications complete?

Are eligibility criteria fair?

Are documents complete?

Is the bid category correct?

Is the timeline realistic?

Is this direct purchase or tender/RFQ?

Stage 3: Procurement Method Selection

The buyer should select one procurement method.

Direct Purchase

RFQ

Open Tender

Limited Tender

Custom Bid

BOQ Bid

Rate Contract

Reverse Auction

Service Bid

Product Bid

GeM's public bid listing includes filters for bid types such as product bid/RA, service bid/RA, product custom bid, BOQ bids, rate contract bids, global tender, limited tender, and single tender. ([BidPlus](#))

5. Buyer Tender / RFQ Creation

When the buyer selects RFQ or tender, the system should show a detailed creation form.

A. Basic Bid Details

Bid title

Bid reference number

Buyer organization name

Buyer type

Department name

Contact person

Email

Mobile number

Procurement category

Bid type

Procurement method

Estimated value

Bid validity period

GeM bid creation documents mention bid duration, bid offer validity, clarification response duration, eligibility criteria, and document requirements as part of bid creation.

B. Item / Service Details

Product/service name

Category

Sub-category

Description

Quantity

Unit

Technical specification

Brand/make preference, if allowed

Model, if applicable

Warranty

AMC/CMC requirement

Installation requirement

Testing requirement

Delivery location

Delivery timeline

C. Required Buyer Uploads

For RFQ/tender, buyer should upload:

1. Tender document
2. Requirement document
3. Scope of work
4. Technical specification document
5. BOQ sheet, if required
6. Drawing/design file, if required
7. Terms and conditions document
8. Eligibility criteria document
9. Financial quote format
10. Competent authority approval
11. Corrigendum document, if modified later

For custom/BOQ-style procurement, public GeM documents mention custom specification/drawing document upload and competent authority undertaking where applicable.

D. Seller Eligibility Criteria

Buyer should define eligibility rules.

GST registration required

PAN required

Udyam certificate required
Minimum years of experience
Minimum annual turnover
Past supply experience
Relevant work order experience
OEM authorization
ISO/BIS/ISI certificate
Local supplier / Make in India declaration
MSE preference applicability
EMD required or exempted
Blacklisting declaration

E. Required Seller Documents

Buyer can choose which documents sellers must upload.

GST certificate
PAN card
Udyam certificate
Company registration certificate
Turnover certificate
CA certificate
Experience certificate
Past work order
Completion certificate
Product catalogue
Technical compliance sheet
OEM authorization letter
BIS/ISI/ISO certificate
Make in India declaration

EMD payment proof or exemption proof

Financial quote PDF

BOQ price sheet

Bank details

Undertaking / declaration

F. Important Dates

Bid publish date

Bid start date

Pre-bid meeting date, if any

Clarification last date

Bid submission end date

Technical opening date

Financial opening date

Bid validity date

Expected award date

Delivery date

6. Bid Publication and Seller Notification

After buyer completes the bid form:

Buyer saves draft

↓

Buyer submits for approval

↓

Approver/Admin reviews

↓

Bid approved

↓

Bid published

Matching sellers are notified

Bid appears in latest bids and bid listing page

Sellers should be notified based on:

Category

Location

Product/service keywords

Seller business type

Past supply category

Verification status

MSME/Udyam status

Large supplier status

Notification channels:

Portal notification

Email

SMS

WhatsApp alert, if integrated

Dashboard alert

7. Seller Bid Participation Flow

Only logged-in and verified sellers/vendors should participate.

Login Rule

If public user clicks Participate:

Redirect to Login

If logged-in buyer clicks Participate:

Show: Only sellers/vendors can participate in bids.

If seller is logged in but not verified:

Show: Please complete seller verification before participating.

If bid is closed:

Disable Participate button.

If seller already participated:

Show existing participation status.

Seller Participation Steps

Your current page should be upgraded into this proper step-by-step form.

Step 1: View Bid

Seller sees:

Bid number

Bid title

Buyer name

Buyer type

Category

Quantity

Estimated value, if visible

Delivery location

Bid start date

Bid end date

Technical opening date

Financial opening date

Required documents

Eligibility criteria

Terms and conditions

Download tender document

Download technical specification

Download BOQ/quote format

Buttons:

Download Bid Document

Download Specification

Download BOQ Format

Continue

Step 2: Check Eligibility

Seller confirms:

I have valid GST registration

I have PAN

I have Udyam certificate, if claiming MSME benefit

I meet experience requirement

I meet turnover requirement

I can deliver to given location

I agree to bid terms

I am not blacklisted

System should auto-check available seller profile data:

GST verified or not

PAN verified or not

Udyam verified or not

Profile completion percentage

Bank verification status

Past documents available or not

Step 3: Upload Technical Documents

This section must have real upload UI.

UI Required

Drag and drop upload box

Choose file button

File preview

File name

File size

Upload progress bar

Remove file button

Re-upload option before final submit

Accepted file types note

Required/optional label

Technical Documents

GST certificate

PAN

Udyam certificate

Company registration

Experience certificate

Work order

Product catalogue

Technical compliance sheet

Quality certificate

OEM authorization

Make in India declaration

Any buyer-specific document

Validation

File type allowed: PDF, DOC, DOCX, XLS, XLSX, PNG, JPG

Maximum file size limit

Mandatory documents cannot be skipped

Virus scan hook, if possible

Document should be locked after final submission

Step 4: Upload Financial Quote

Financial quote should be kept locked and private until financial evaluation.

Financial Form Fields

Base quoted amount

GST percentage

GST amount

Freight charges

Installation charges

AMC/CMC charges

Discount

Total quoted amount

Delivery timeline

Payment terms

Price validity period

Upload financial quote PDF

Upload BOQ price sheet, if applicable

Important security rule: financial documents should not be visible to buyer during technical evaluation. GeM public updates also state that financial documents are visible to the buyer during financial evaluation only. ([Gov e-Marketplace](#))

Step 5: Review Submission

Seller sees a final summary:

Bid details

Eligibility confirmation

Uploaded technical documents

Financial quote summary

Declaration

Terms and conditions

Seller must check:

I confirm all uploaded documents are correct.

I understand that I cannot edit after final submission.

I agree to the terms and conditions.

Step 6: Final Submit

Submission should happen with secure verification.

Recommended options:

OTP verification

Email OTP

Mobile OTP

eSign integration, if available

DSC integration, optional future feature

GeM seller participation material shows offer submission after agreeing to terms and verification using OTP/eSign/DSC-style flow.

After submit:

Participation number generated

Submission timestamp saved

Documents locked

Financial quote locked

Audit log created

Seller receives confirmation

Buyer sees participation count only

Step 7: Track Status

Seller should see:

Bid Published

Seller Participated

Technical Evaluation Pending

Clarification Required

Technically Qualified / Disqualified

Financial Evaluation Pending

Financial Evaluated

L1/L2/L3 Rank, if allowed after result

Awarded / Not Selected

8. Clarification Process

Clarification is used when the buyer/evaluator needs more information from a seller during technical evaluation.

GeM bid creation documents mention that buyers can seek clarifications from sellers during technical evaluation and sellers must respond within the declared time; clarification can be sought multiple times.

Flow

Buyer opens technical evaluation

↓

Buyer views seller documents

↓

Buyer raises clarification

↓

Seller receives notification

↓

Seller responds with text and documents

Buyer reviews response

Buyer marks clarification completed/reopened/rejected

Clarification Fields

Clarification request number

Bid number

Seller name

Question

Clarification type

Requested document

Due date

Buyer remarks

Seller response

Seller uploaded file

Status

Requested date

Responded date

Status

Pending

Responded

Completed

Reopened

Rejected

Expired

Important: the clarification and remarks should be visible only to that seller, buyer, evaluator, and admin.

9. Technical Evaluation

Technical evaluation starts only after bid closes.

Technical Evaluation Flow

Bid closes

Buyer opens technical evaluation

System lists all participating sellers

Buyer/evaluator checks documents

Buyer may ask clarification

Buyer marks each seller Qualified or Disqualified

Buyer adds private remarks

Technical evaluation report is uploaded

Technical evaluation is completed

Only qualified sellers move to financial evaluation

Technical Evaluation Checklist

GST valid

PAN valid

Udyam valid, if claimed

Experience criteria met

Turnover criteria met

Required certificates uploaded

Technical specification matched

Product/service compliance accepted

Delivery timeline accepted

EMD/exemption valid

No missing mandatory document

Clarification response acceptable

Technical Result Status

Qualified

Disqualified

Clarification Required

Pending Review

Remarks Visibility

Seller A can see only Seller A remarks.

Seller B can see only Seller B remarks.

Buyer can see all remarks.

Admin can see all remarks.

Public cannot see technical remarks.

10. Financial Evaluation

Financial evaluation opens only after technical evaluation is completed.

Financial Evaluation Flow

Technical evaluation completed

↓

Only qualified sellers selected

↓

Buyer opens financial evaluation

↓

System unlocks financial quotes of qualified sellers only

↓

System calculates total evaluated price

↓

System generates L1, L2, L3, L4 ranking

↓

Buyer reviews price comparison

↓

Buyer recommends award

In GeM bid awarding references, after opening the financial bid, L1 is displayed, price comparison can be downloaded, and disqualified sellers are removed from price comparison.

Financial Ranking Logic

Lowest total evaluated price = L1

Second lowest = L2

Third lowest = L3

Fourth lowest = L4

Total evaluated price may include:

Base price

GST

Freight

Installation

Warranty cost

AMC/CMC

Buyback adjustment

Discount

Commercial loading factor, if applicable

11. Award Process

Normal Government-Style Rule

In transparent procurement, the system should normally recommend the **L1 technically qualified seller**.

GeM public bid awarding FAQs state that bid awarding has two stages, technical and financial, and that a buyer cannot bypass L1 and select L2/L3/L4 directly during bid awarding.

So in JsgSmile, do not allow free selection of any bidder without control.

Recommended JsgSmile Rule

Default award = L1 seller

If buyer wants to select non-L1:

- Require strong reason
- Require competent authority approval
- Require admin approval
- Store audit log
- Notify platform admin

Valid non-L1 reasons may include:

L1 refused order

L1 failed document verification

L1 delivery timeline not acceptable

L1 blacklisted after evaluation

L1 does not accept final terms

Quality-based selection method was selected before bid publishing

Split award was defined before bid publishing

12. Final Award / Bid Reward

After approval:

Buyer selects/recommends seller

Admin/competent authority approves award

System creates award letter

Seller receives award notification

Seller accepts award

Purchase order/work order generated

Contract created

Delivery starts

Documents generated:

Award letter

Purchase order

Work order

Contract copy

Financial approval

Sanction note

Seller acceptance

Delivery schedule

13. Post-Award Flow

Seller accepts PO

Seller delivers goods/services

Buyer verifies delivery

GRN/service completion certificate created

Invoice generated

Payment initiated

Payment held/processed as per portal payment flow

Settlement completed

Order closed

For your JsgSmile payment model:

Buyer pays through portal

Amount goes to Bandhan Bank nodal/escrow account

Payment held for settlement

T+1 settlement to seller

Final receipt/invoice generated

14. Required Pages in JsgSmile

Buyer Side

15. Participate Page UI Improvements

Your current page should be improved like this:

Top Section

Bid title

Bid number

Buyer name

Closing date countdown

Bid status badge

Participation status badge

Login/verification alert

Example alert:

Please login as a verified seller/vendor to participate in this bid.

Left Stepper

1. View Bid

2. Check Eligibility

3. Technical Offer

4. Upload Technical Documents

5. Financial Quote

6. Review & Declaration

7. Submit Bid

8. Track Status

When user clicks each step, the right-side form should change properly.

Upload Section UI

Every document upload field should have:

Drag and drop area

Choose file button

Accepted file format

Max file size

Upload progress

Preview file

Remove file

Re-upload before final submit

Required/optional badge

Do not show only fake input text like technical-documents.zip. It should be a real upload component.

Financial Quote Section UI

Quoted base amount

GST percentage

Freight charges

Installation charges

Discount

Total evaluated amount auto-calculated

Upload quote PDF

Upload BOQ Excel/PDF

Save Draft

Continue

Add warning:

Your financial quote will remain sealed and will be visible to buyer only during financial evaluation.

Final Submit UI

Declaration checkbox

Terms acceptance

OTP verification

Submit Bid button

Confirmation modal

Participation receipt download

16. Security Rules

Login and Role Protection

Public user:

Can view public bid details only.

Seller:

Can participate only after login and verification.

Buyer:

Can publish and evaluate own bids only.

Admin:

Can monitor all bids and approvals.

Financial Security

Financial quote must remain hidden before financial evaluation.

Only qualified sellers move to financial evaluation.

Rejected sellers should not appear in financial comparison.

Seller cannot edit quote after final submission.

Document Security

Use private file storage

Use signed URLs

Validate file type

Validate file size

Sanitize file name

Scan files if possible

Keep upload audit trail

Audit Logs

Track:

Bid created

Bid approved

Bid published

Seller participated

PAYMENT_SETTLED

CLOSED

18. Minimum Documents Required

Buyer Minimum Documents for RFQ/Tender

1. Requirement document
2. Technical specification document

3. Scope of work
4. Quantity/BOQ sheet
5. Terms and conditions
6. Eligibility criteria
7. Financial quote format
8. Approval note
9. Delivery schedule

Seller Minimum Documents

1. GST certificate
2. PAN
3. Udyam certificate, if MSME benefit claimed
4. Company registration / shop act / incorporation proof
5. Technical compliance sheet
6. Product catalogue / service profile
7. Experience/work order proof
8. Financial quote
9. BOQ price sheet, if required
10. Declaration/undertaking

The exact document count should be configurable by buyer while creating the bid.

19. Final Recommended Flow for Your Portal

Buyer raises requirement

Buyer uploads tender/specification/BOQ documents

Buyer submits bid for approval

Admin/approver verifies and publishes

↓

Relevant sellers receive notification

↓

Seller logs in

↓

Seller verifies eligibility

↓

Seller uploads technical documents

↓

Seller uploads sealed financial quote

↓

Seller submits bid using OTP/eSign-style confirmation

↓

Bid closes

↓

Buyer performs technical evaluation

↓

Buyer asks clarification if required

↓

Seller responds

↓

Buyer qualifies/disqualifies sellers with private remarks

↓

Only qualified sellers go to financial evaluation

↓

Financial quotes are opened

↓

System generates L1, L2, L3, L4 ranking

↓

Buyer recommends L1

↓

Admin/competent authority approves award

↓

Award letter / purchase order generated

↓

Seller accepts order

↓

Delivery, GRN, invoice, payment, settlement

20. Key Point for Your Development Team

The most important rule is this:

Bidding should not be just a UI form.

It should be a secure workflow with login, verification, document locking, sealed financial quote, technical evaluation, financial evaluation, ranking, award approval, and audit trail.

Your current participate page should now be converted into a real submission system with actual upload, validation, login gating, seller verification, private remarks, and stage-based access control.
